

Developing infographics to describe disease burden among AI/AN communities

Project Title	Developing infographics to describe disease burden among AI/AN communities
Project Summary	The intern will conduct research and construct infographics or other communication messages/reports to describe disease burden among AI/AN communities.
Country	United States

Project Description

The intern will create infographics to support the IHS Division of Epidemiology and Disease Prevention research areas. The infographics would be targeted to different audiences including medical providers, public health practitioners and public. The intern will support the creation of infographics by conducting literature reviews and research. The intern might support other projects for the division including participating in research projects, supporting the creation of newsletters and other communication messages/reports.
